- Any additional items/things we missed?
  - Iterate on [List of Requirements](#)
  - Ask for clarification on individual websites
  - Look into Personal Website - Judy

### Post-Meeting

- Send out email with meeting 2 minutes and summary and CC TA/Instructor: polanco3@msu.edu

### Meeting Summary

We worked on an iteration of our Intermediate Diagram assignment due on Friday afternoon. We sent our current progress to Dr. Cheng and TAs for feedback, and plan to work on the assignment tomorrow in breakout rooms during class. We chose Judi to be the one who turns in our final iteration of this week's assignment before Friday at 5PM. We also noted that we will need to work on our list of requirements and have added to our project issues list. During office hours on Tuesday, 11/8, Edie heard someone asking about individual websites, and we noted that we would like further clarification into what that entails. Next week's meeting will include discussing and working on Prototype Version 1 to be turned in Friday, 11/18 before 5PM.
