PCAS1 Meeting 5

[Meeting Zoom Link](#)

[Meeting 5 Minutes](#)

[Ongoing Project Issue List](#)

[SRS Document](#)

Meeting Summary

The project manager and facilitator debriefed the other team members on feedback given during today's class from other groups. There were several small changes suggested as well as a few larger changes. Dean and Edie are to make finishing touches on the review summary document and will turn in the document tomorrow, 11/23 by 5PM. Team members are expected to look over their sections of the SRS document and read corresponding comments and amend them for the next iteration of the document. We briefly touched on the Prototype and want to consider creating something more interactive as well as having the visual be in bird's eye view. We agreed that the next meeting will consist of revisiting the SRS and Prototype iterations in order to meet our next iteration's deadline of Friday 12/2 at 5PM, as well as discussing the state of our override mechanism.

Agenda

- Discuss Inspection Summary (PM and Facilitator)
- Discuss SRS Document Iteration
- Create a tentative agenda for meeting 6

Action List

Group HW (PM and Facilitator) - Prototype Version 1 (due 11/23 at 5PM)
- Discuss what we have to work on
  - Include SRS reviews into summary and clean things up to get things ready for submission

SRS Document Iteration
- Check over Scenarios section (within section 5) and give feedback
- Feedback is added to google doc as comments - look over the sections you wrote and amend comments added by Dean and Edie on 11/22 (relating to SRS feedback)

Meeting 6

- Scheduled for Wednesday 11/30 at 5PM - 6PM
- Create tentative agenda
  - Check-in on SRS revisions
  - Continue discussion on PCAS(alert and braking) override
  - Continue work on Prototype

Open Floor
- Any additional items/things we missed?
- Override PCAS and Alert system:
  - Only when at a full stop?
- Prototype
  - Do we want it to be a bird's eye view?

Have a great Thanksgiving!
